

High quality, High nutrient MulchMax[®]

Superior water retention

A mix of fine and coarse mulch absorbs and holds 94% of water. That means less watering.

Adds nutrients naturally

Our unique blend of ground foliage, wood, and 8 weeks aging, produces a nutrient-rich mulch that feeds plants and improves soil quality.

Looks great

The rich brown colour makes MulchMax[®] perfect for weed suppression in gardens, public spaces, and planting projects.

Go green

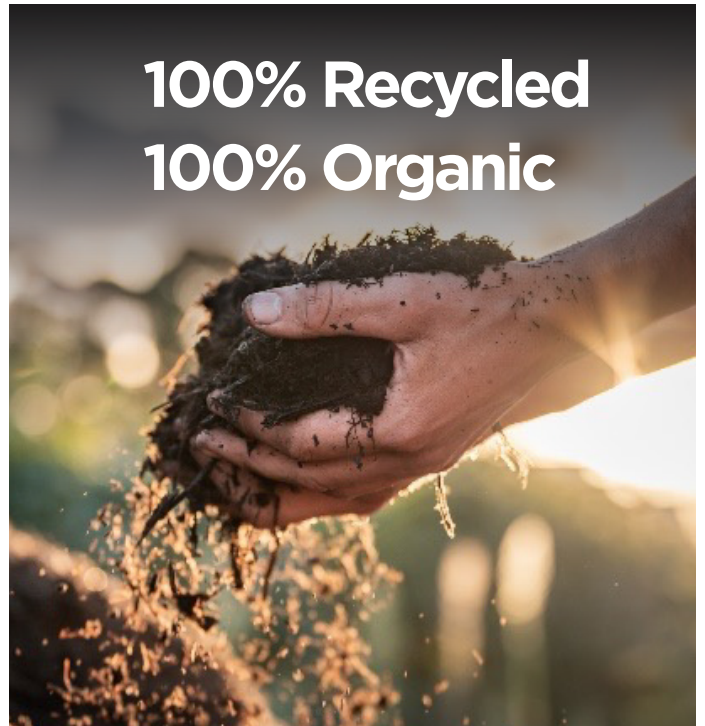

100% recycled from local landscape waste and a by-product of our greenwaste collection and recycling operation, choosing MulchMax[®] equals a lower carbon footprint.

MulchMax[®] is available in quantities from 3m³ and also have delivery options to suits your needs.

GreenCycle is transforming greenwaste that others can't - flax, palm, and bamboo. Our unique process means all greenwaste is recycled into MulchMax[®], our high-quality, nutritional mulch.

**100% Recycled
100% Organic**

PRODUCT SPECIFICATIONS (Typical)

pH	5 - 7.5
Conductivity (mS cm-l)	≥ 4
Moisture	50-55%
Particle Size	80% ≥ 80mm
Bulk Density (kg/m ³)	400-500kg/m ³

NZS4454-2005 compliant • BioGro certified organic
