

Nutripower®

Compost

by
GreenCycle

Power-up your project.

Made from recycled green waste, Nutripower® Compost revives soil, boosts plant growth and improves moisture retention.

Feed plants naturally

Enrich your soil with essential nutrients to support robust plant growth without synthetic fertilisers.

Balance moisture retention

Help clay soils drain, and sandy soils retain moisture and nutrients.

Boost Soil Health

Retain vital nutrients, attract beneficial earthworms, and stimulate microbial activity for a thriving soil ecosystem.

Enhance soil structure

Improve air and water penetration to support plant roots and grow healthier plants.

Product Specifications

pH range	6.0 - 8.5
Electrical conductivity (mS/cm)	> 5
Moisture	> 40 - 50%
Bulk Density (kg/m ³)	500 - 650
Particle < 20mm	95%
Total Nitrogen	1.24%
Total Phosphorus	0.23%
Total Potassium	0.90%
Total Calcium	2.10%
Total Magnesium	0.60%
Total Sulphur	0.17%
Organic Matter	40 - 45%
C/N Ratio	20:1 - 25:1

NZS4454 Compliant.

How to Use

Compost is nutrient-rich and must be dug into existing soil. Do not plant directly into compost. Work a 50mm layer into the top 250mm of soil to add nutrients and improve soil texture.

CAUTION: Ordinary garden soil and products like compost may contain a variety of living micro-organisms, which while great for your garden can, on rare occasions, cause illness in humans. We recommend the following precautions: AVOID INHALING THE MIX, WEAR A MASK AND GLOVES, AND WASH HANDS AFTER USE. Seek medical advice if you develop high fever, chills, breathlessness or a cough.

GreenCycle transforms the greenwaste others can't. Our unique process recycles all greenwaste, including flax, palm and bamboo, into high-quality landscape products.
